

MOBILE DEVELOPER, IOS & ANDROID

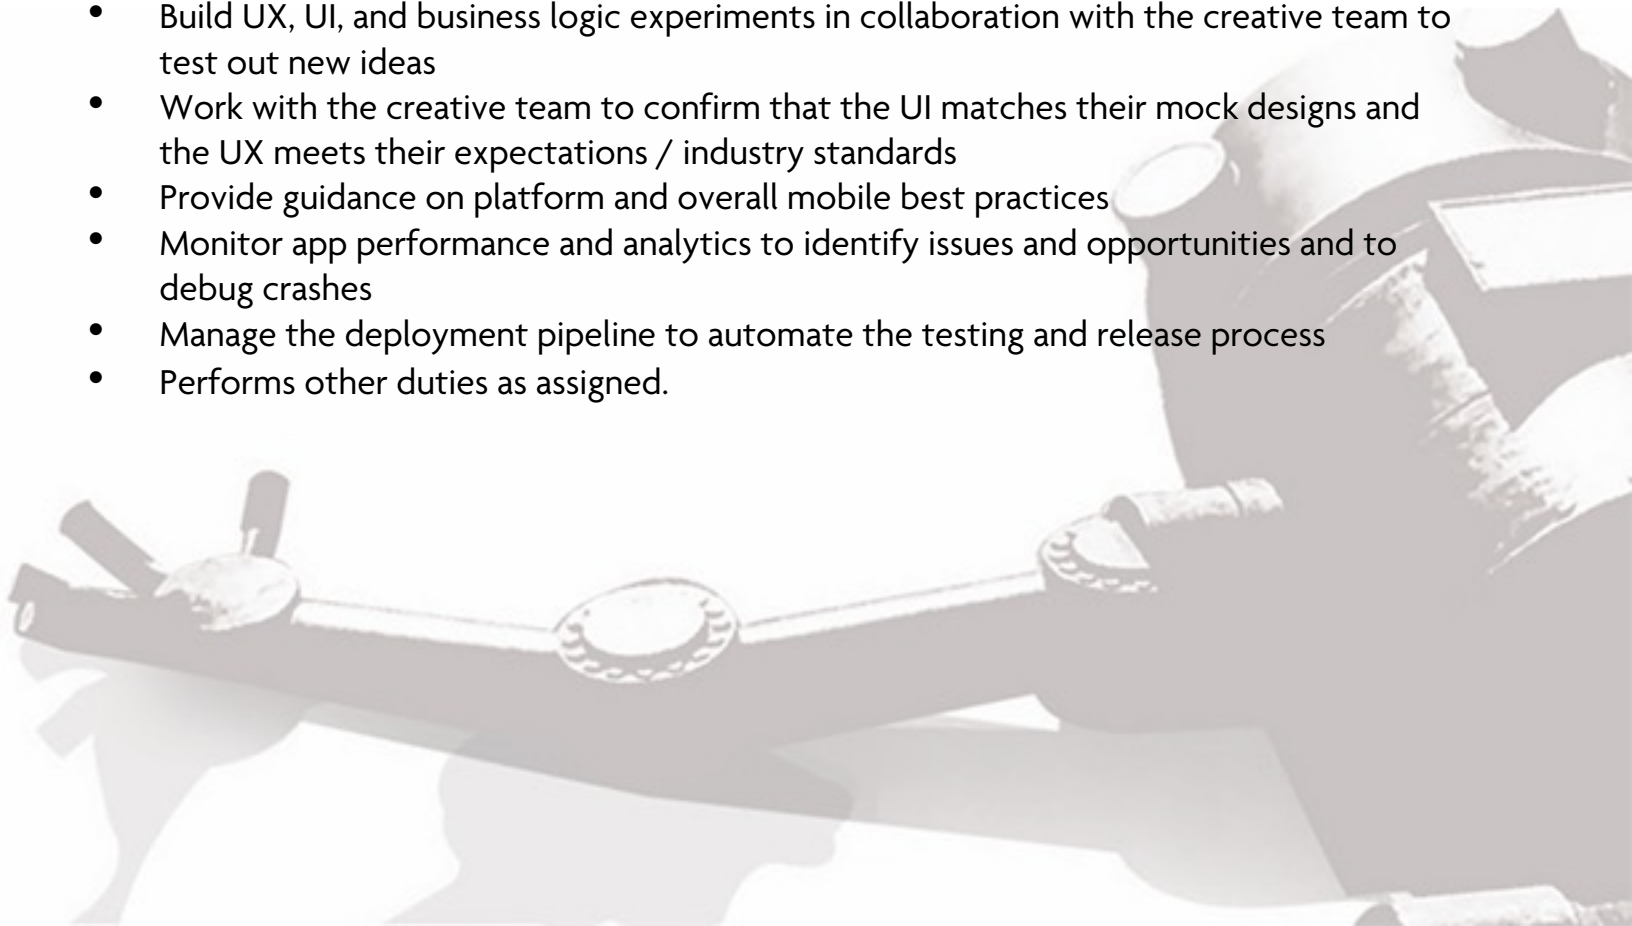

JOB OVERVIEW:

AREA15 is looking for a mobile developer to join our development team. Our department has a fast-paced startup approach and, as such, applicants should be hungry to take on new challenges and have the ability to learn new concepts quickly. There are many opportunities to grow in this role as you will work on a variety of projects that utilize the latest mobile capabilities and frameworks. Technical ability is important, but as important, is your attitude and fit. Even if you don't quite meet the qualifications, if this sounds like you, we encourage you to apply.

RESPONSIBILITIES AND DUTIES:

- Take ownership of the codebase, ensuring that the code is readable, maintainable, documented, and follows formatting standards
- Collaborate with the larger team to plan feature releases and to suggest changes / enhancements
- Ensure delivery timelines are up-to-date and that key dates and goals are met
- Confirm that the features / functionality delivered align with the original business objective(s)
- Write Unit tests and perform Functional testing to assure the quality of the app remains high and to help identify issues early in the development process
- Build UX, UI, and business logic experiments in collaboration with the creative team to test out new ideas
- Work with the creative team to confirm that the UI matches their mock designs and the UX meets their expectations / industry standards
- Provide guidance on platform and overall mobile best practices
- Monitor app performance and analytics to identify issues and opportunities and to debug crashes
- Manage the deployment pipeline to automate the testing and release process
- Performs other duties as assigned.
